

AMENDMENTS TO THE SPECIFICATION WITH MARKINGS TO SHOW CHANGES MADE

Replace Paragraph [0016] as follows:

8. --[0016] Turning now to the drawing, and in particular to FIG. 1, there is shown a top and side perspective illustration of a semi-finished tubular formed body according to the present invention, which is fabricated from a blank 1 made of corrugated cardboard that can be lined on both sides. The blank 1 has a strip-shaped configuration and is subdivided in a series of successive sections which form layers 2 of a multi-layer formed body after rolling up the blank 1, as shown in FIG. 2. The layers 2 are ~~separated~~ in end-to-end relationship and separated from one another by score lines 5 of a length that is so selected that a substantially play-free support of single layers 2 is realized when rolling up the blank 1. The score lines 5 extend across the longitudinal extension of the blank 1 in parallel relationship to the flutes of the corrugated cardboard and define a weak material zone to realize easy folding of the blank 1 during the rolling operation.--.
